FOR IMMEDIATE RELEASE
February 28, 2009

DJ Gillit hired to lead Virtualization Department

We would like to welcome DJ Gillit to the localLINUX team. Mr. Gillit is a Lubbock, Texas native and graduate of Lubbock Christian University. He has specialized expertise in virtualization projects including Disaster Recovery planning, High Availability, and more.

In addition to leading the Virtualization Department, DJ is a member of our Systems Integrations and Special Projects team. Prior to joining localLINUX, he worked as a network engineer supporting the Windows server operating system as well as Microsoft Exchange Server and VMware virtualization clusters. His implementations include virtualization clusters for several clients in the financial, telecommunications and transportation industries. During his spare time, DJ enjoys spending time with his fiancée Castle and coaching little league baseball.

“DJ’s talent, expertise, and personality have been a perfect fit for localLINUX.”, said Michael Strong, COO. “With his expertise in virtualization solutions, DJ has hit the ground running leading our Virtualization Department. Our commitment to providing quality solutions to our business clients is paramount, and DJ’s skills are an integral part of these consulting services.”

To contact DJ directly or to learn more about virtualization solutions call the main office number and dial his extension. (806) 687-4765 x108
