Lubbock-based localLINUX completes construction on new Network Operations Center

Lubbock - localLINUX, a locally-owned firm offering technology consultation, managed services, and security and networking solutions, has expanded its operation by completing the construction on the Network Operations Center.

Founded in 2002, localLINUX serves hundreds of corporate clients across Texas and the U.S. The Network Operations Center allows the business expanded capabilities to monitor and manage customer networks, says Michael Strong, COO.

"The Network Operations Center is the backbone of all our managed service offerings. Our technicians now have additional resources at their fingertips to discover and resolve problems more quickly. " he says. "Our commitment to quality service and support has never been stronger. We are excited about the additional features the Network Operations Center provides as we continue to service our clientele."

Located at 5502 58th street, suite 400, in Lubbock, localLINUX can be found on the Web at: www.locallinux.com.
